## 宝德龙企业简介

南京宝德龙仓储设备有限公司/安徽宝德龙货架制造有限公司总部位于南京市江宁开发区胜太东路36号胜泰华府大厦四楼，销售中心位于南京市将军大道20号中惠国际大厦七楼，工厂位于安徽省天长市汭涧镇工业园区工业大道，生产厂区占地面积17000m<sup>2</sup>，总注册资金2200万，专业从事各种轻型货架、中型货架、重型货架、托盘/横梁式货架、贯通|通廊式货架、阁楼式货架、穿梭式货架、悬臂式货架、移动式货架、钢平台、抽屉式货架、汽车4S店货架、自动化立体仓库以及各种仓储物流用金属工位器具的生产及销售，公司已拥有13年的货架制造历史以及18年的行业从业经验，公司现已通过ISO9001国际质量认证、CE国际产品安全认证、BV国际企业资质认证以及SGS国际出口企业资质认证，经过多年发展，我们已在国内成功合作几千家不同行业客户，同时我们的产品已经出口至全球30多个不同的国家，并广受好评！

为确保我们的产品永居行业前列，公司严格按Botro-Racking品牌要求，现已配备如下数条专用生产线：

- ◆ 九条全自动型材轧制生产线
- ◆ 一条多台冲床组成的冲压生产线
- ◆ 一条多台焊机组成的焊接生产线
- ◆ 一条槽浸式前处理生产线
- ◆ 一条全自动环保废水处理生产线
- ◆ 两条全自动伺服精密自动冲压生产线
- ◆ 一条多台折弯机组成的折弯生产线
- ◆ 一条多台剪板机组成的剪切生产线
- ◆ 一条全自动静电粉末喷塑生产线
- ◆ 一条全自动抛丸打磨生产线

## Company Introduction

Nanjing botro storage equipment Co., Ltd. Anhui botro shelf Manufacturing Co. Ltd. is headquartered in Nanjing City, Jiangning Development Zone Sheng Tai Road No. 36 building four floor santari Washington, sales center is located in Nanjing City, general road No. 20 Hui International Building seven buildings, factory located in Anhui province Tianchang Chajian Town Industrial Park Industrial Avenue, production plant covers an area of 17000M<sup>2</sup>. The total registered capital of 22 million, specializing in a variety of light shelves, shelves, heavy shelves, pallet / rack beams, through | corridor style shelves, loft style shelves, shuttle rack, cantilever type shelves, mobile shelves, steel platform, drawer type shelves, auto 4S shop shelves, automated warehouse and warehouse logistics for production and sales of metal equipment, the company has 13 years of history and 18 years of shelf manufacturing industry by Experience, the company has passed ISO9001 international quality certification, CE international product safety certification, BV international qualification certification and SGS international certification of export enterprises, after years of development, we have cooperation in the domestic success of thousands of customers in different industries, and our products have been exported to more than 30 different countries worldwide, and widely acclaimed!

## 公司优势：

- 1、我们拥有13年的制造历史，以及18年的行业从业经验；
- 2、中国最大的货架实体制造工厂之一；
- 3、我们拥有一个总部 + 一个销售中心 + 一个制造工厂；
- 4、我们的产品已经出口至全球30多个国家，并享有好评。

## Company advantages:

- 1、we have 13 years of manufacturing history, and 18 years of experience in the industry;
- 2、China's largest shelf entity manufacturing plant;
- 3、we have a headquarters + a sales center + a manufacturing plant;
- 4、our products have been exported to more than 30 countries in the world, and enjoy high praise.

## 外宾来访 Foreign visitors

Welcome customers from all over the world to exchange and cooperate with us.

## 企业资质 Enterprise qualification:

## 设备展示 Equipment display:

近年来，公司不断提高产品质量，生产规模日益扩大，改进了很多生产工艺并添置了大量先进生产设备。

In recent years, the company has continuously improved product quality, expanding production scale, improved a lot of production processes, and acquired a large number of advanced production equipment.

## 办公环境 Office environment

公司注重人才的培养和锻炼, 为了吸引人才、留住人才, 为员工提供了优质的人文办公环境。

Companies focus on talent training and training, in order to attract talent and retain talent, to provide employees with high-quality office environment for humanity. advanced production equipment.

- 4S店专用货架 4S store special shelf . . . . .
- 工位器具 Metal products and working equipment . . . . .
- 配套产品 accessory products . . . . .

## 中型货架(A)型:

主要由立柱、横梁、层板组成，组装、拆卸简便，外形美观大方，中型货架适用于人工存取货物情况，承载能力通常为150KG—300KG/层，可以满足大部分使用要求。

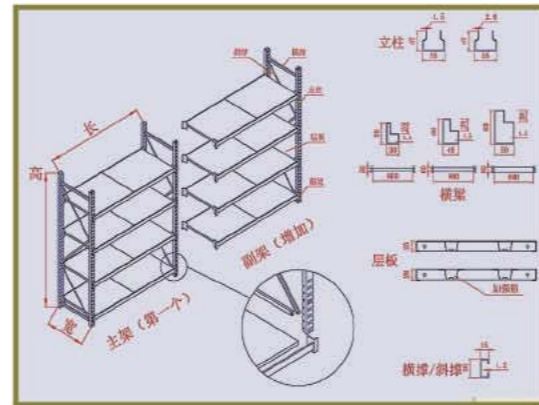

Medium rack (A) type : Mainly by the column, beam, plate, convenient assembly and disassembly, beautiful appearance, suitable for manual access to goods shelves, carrying capacity is usually 150KG - 300KG/ layer, can meet the most requirements.

## 中型货架(B)型:

柱片与P型闭口梁插接组成货架框架, 钢层板置于横梁之上形成货架整体, 采用安全销固定, 结构简单可靠。柱片由立柱、横撑、斜撑以螺栓连接而成。

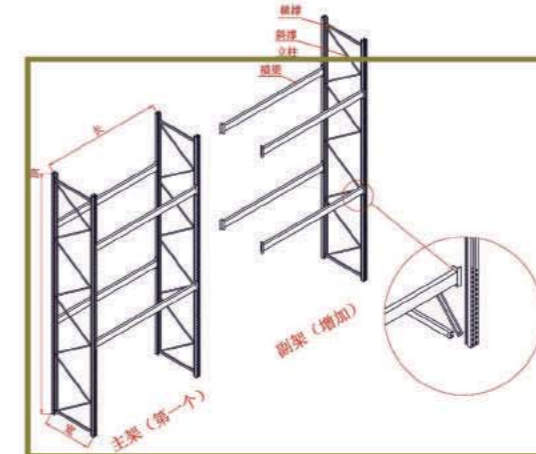

Medium sized shelf (B): the column and the P type closed beam are inserted into a shelf frame, and the steel plate is arranged on the cross beam to form a whole shelf, and the safety pin is adopted to fix the structure, so the structure is simple and reliable. The column is made up of bolts, braces and braces.

## 重型横梁式货架:

是以存取托盘货物为目的的专业仓库货架; 由柱片、横梁组成, 横梁式货架结构简洁、安全可靠。每层最大承载可达5T。

Heavy crossbeam type shelf: it is a professional warehouse shelf for the purpose of accessing pallet goods. It is composed of post and crossbeam, and the crossbeam type shelf is simple, safe and reliable. The maximum carrying capacity is 5 tons per floor.

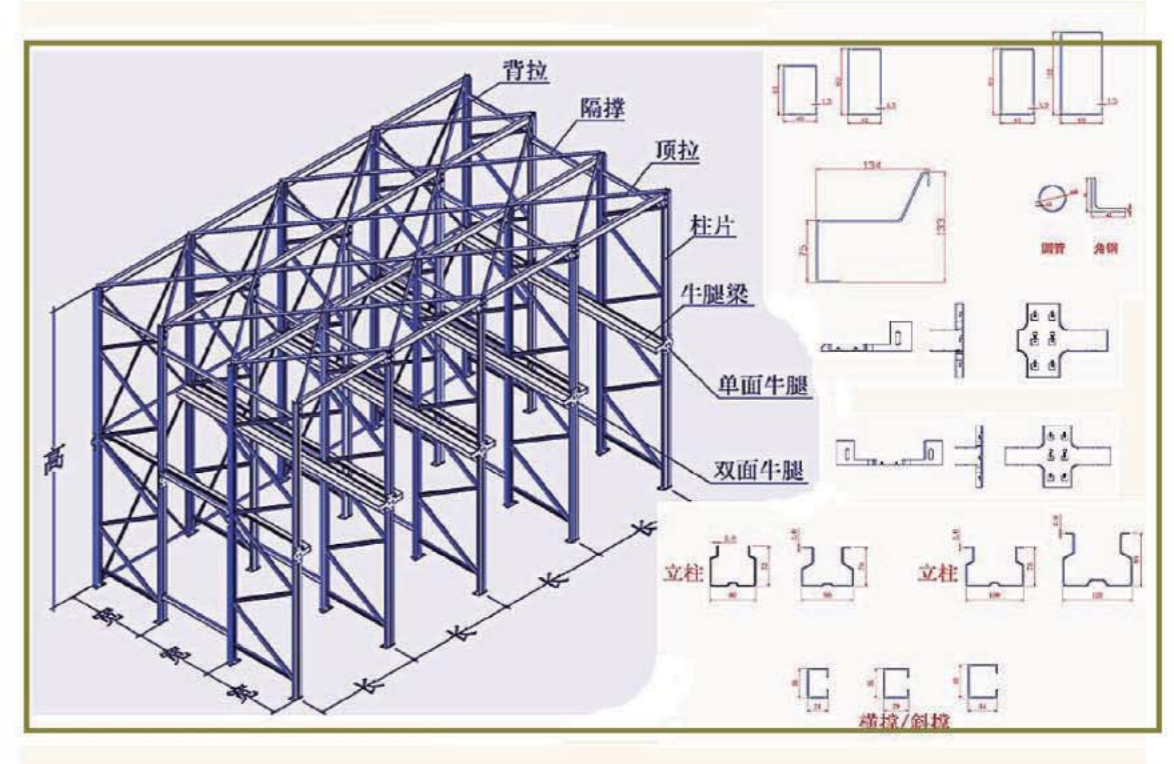

## 贯通式货架:

可供叉车（或带货叉的无人搬运车）驶入通道存取货物，适用于品种少，批量大类型的货物储存。

Through rack: forklift truck (or truck with goods fork) can be used to store goods. It is suitable for storing goods of small quantity and large quantity.

## 阁楼式货架:

是在已有的工作场地或货架上建一个阁楼，以增加存储空间，可做双层或多层阁楼。  
Attic shelf: a loft built on existing work sites or shelves to increase storage space, or double deck or multi tier loft.

## 钢结构平台：

全组装式结构，设计灵活，可根据不同的现场情况设计并制造符合场地要求、使用功能要求及满足物流要求的钢结构平台。

Steel platform: fully assembled structure, flexible design, according to different site conditions, design and manufacture meet the requirements of the site, the use of functional requirements and meet the logistics requirements of the steel structure platform.

## 压入式货架:

采用轨道和托盘小车相结合的原理，轨道呈一定的坡度（3°左右），利用货物的自重，货物先进后出，适用于大批量少品种的货物存储，空间利用率很高。

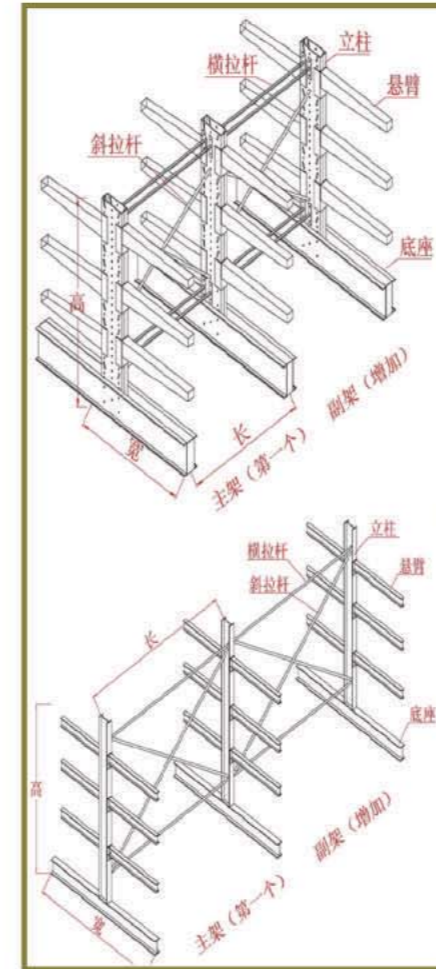

Press rack: principle of the track and the tray cart is combined with the orbit of a certain slope (about 3 degrees), the weight of goods, goods advanced after a few varieties suitable for mass storage of cargo, space utilization rate is very high.

## 悬臂式货架:

主要由立柱片、悬臂梁、连接杆等组成，存放不规格或是长杆件物料，能大幅度提高仓库的利用率和工作效率，悬臂可是单面或双面。

Cantilever shelf: mainly by column, cantilever beam, connecting rod and so on, the storage of non-standard or long rod materials, can greatly improve the utilization of the warehouse and work efficiency, the cantilever is single-sided or double-sided.

## 流利式货架:

采用辊轮铝合金, 钣金等流利条, 利用货物台架的自重, 从一边通道存货, 另一边通道取货实现先进先出, 存储方便。

Fluent strip shelves: use roller, aluminum alloy, sheet metal and other fluently, use the weight of the goods stand, from the side of the channel inventory, and the other side of the channel to carry out, FIFO, storage convenience.

## 重力式货架:

重力式货架采用的是先进先出的存储方式, 货架深度及层数可按需而定。重力式货架适用于少品种大批量同类货物的存储。

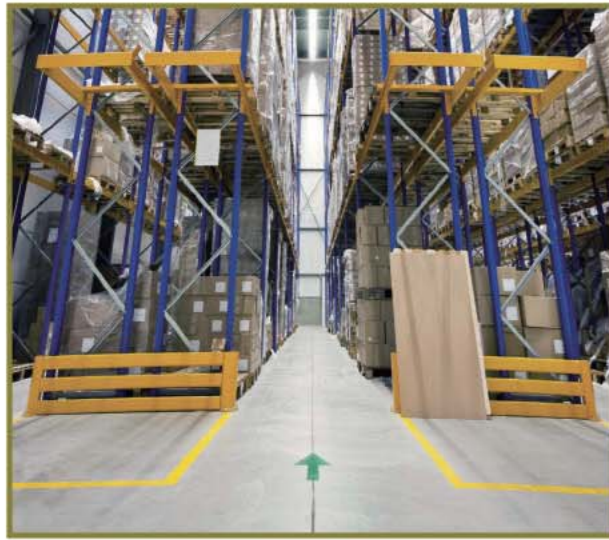

Gravity shelves: gravity shelves adopt the FIFO storage, and the shelf depth and number of plies can be determined as required. The gravity type shelf is suitable for the storage of less varieties and large quantities of similar goods.

## 窄巷道货架:

最大特点就是通道比一般的横梁式窄得多, 大概在1600mm-2000mm左右, 大大的提高了仓库的空间利用率。

Narrow tunnel shelves: the biggest feature is that the channel is much narrower than the general beam type, probably around 1600mm-2000mm, greatly improving the warehouse space utilization.

## 移动式货架:

仅需设一条通道，空间利用率极高，安全可靠，移动方便，根据承重可分为重型、中型和轻型三种，一般重型货架采用电动控制便于移动，轻型、中型一般采用手摇移动。

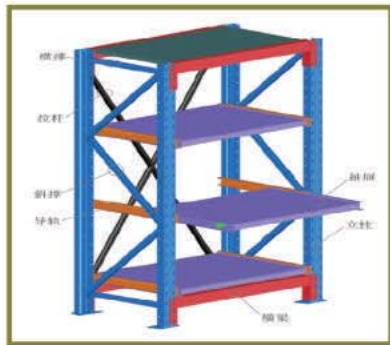

Mobile rack: only one channel, the space utilization rate is extremely high, safe and reliable, convenient to move, according to the bearing can be divided into three kinds of heavy, medium and light, usually heavy shelves using electrical control for mobile, light and medium by hand movement.

## 抽屉式货架:

主要用于存放各种模具物品; 顶部可配置移动葫芦车 (手拉或电动), 抽屉底部设有滚轮轨道, 承载后依然能用很小的力自如地拉动。

Drawer type shelf: mainly for the storage of a variety of mold objects; the top can be equipped with mobile hoist (hand or electric), drawer bottom with roller track, bearing still can use very little force to pull freely.

## 穿梭式货架:

由货架、台车以及叉车组成的高密度储存系统, 这种高效率的储存方式是为了提高仓库空间的利用率, 为客户带来的全新存储选择!

Shuttle car shelves: a high-density storage system consisting of shelves, trolleys and forklifts. This efficient storage method is designed to increase the utilization of warehouse space and provide new storage options for customers!

## 自动化立体仓库:

利用立体仓库设备可实现仓库高层合理化,存取自动化。由货架,巷道式堆垛起重机、入(出)库工作台和自动运进(出)及操作控制系统组成。

Three dimensional automated warehouse shelves: the use of three-dimensional warehouse equipment, warehouse height can be achieved rationalization, access automation. From the shelves, tunnel type stacking crane, (a) into the database table and automatically into (out) and operation control system.

## 其它货架 (Other shelves) :

## 4S店专用货架:

组合式结构（阁楼货架+中型货架），针对汽车行业备件特点及存放形式，设计了适合其储存的专业汽车4S店货架。

### 4S store special shelf:

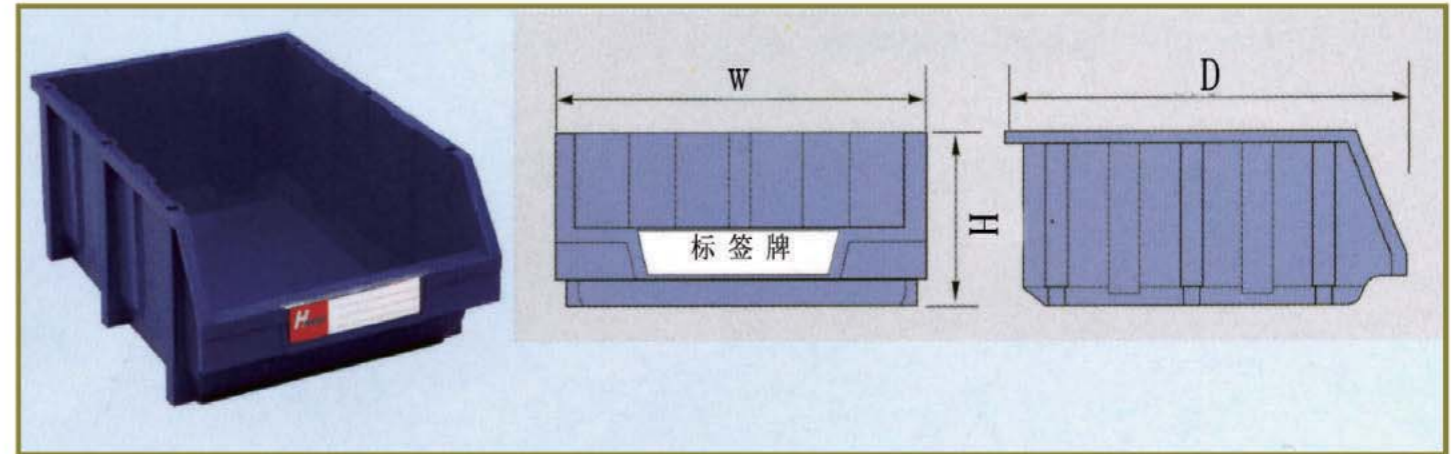

Composite structure (attic shelf + medium-sized shelf), for the automotive industry spare parts features and storage forms, designed for its storage of professional car 4S shop shelves.

### 金属制品及工位器具 (Metal products and working equipment):
